

YASH GROUP

Water Efficiency Management Policy

At YASH, we recognize water as a vital and shared resource essential to life, ecosystems, and our operations. We are committed to managing water responsibly across all our activities, ensuring its sustainable use and conservation. Our approach is guided by a deep sense of environmental stewardship, community responsibility, and continuous improvement. In alignment with these principles,

YASH commits to,

- **Reducing Water Consumption:** Through responsible management, reuse, and recycling practices.
- **Water Resource Conservation:** By adopting water recharge, harvesting, and conservation technologies, along with effective wastewater treatment.
- **Addressing Water Risks:** By working closely with local communities to mitigate risks such as scarcity, flooding, and pollution.
- **Transparency and Reporting:** By disclosing water performance, conservation initiatives, and achievements annually to stakeholders.
- **Continual Improvement:** By adopting innovative technologies, best practices, and stakeholder inputs for sustainable water management.
